Art. 11.7 Special procedures and activities

Art. 11.7.1 Availability of participants

Participants who park their vehicles in the Parc Fermé upon passing the finish line, must remain available by phone (mobile) until the final classification have been posted.

Art. 11.7.2 Classification

Digital Notice Board: Sortity

Art. 11.8 Official time used during the event

GPS time

Art. 11.9 Electronic start procedure at the start of a Selective Section

The start of the selective section is happening based on an electric clock and lamp, connected to a false start alert system.

When the car arrives at the start line, the front of the car should be positioned behind a stick placed by the marshal to define the exact start position. One minute before the start time, but not before the car has stopped in its exact position, the marshal shall remove the stick and the crew shall refer to the automatic countdown clock. Any subsequent change of the car's position until its start time is not permitted and will be reported to the Stewards.

Art. 11.10 Service

Using a min 5x4m protector groundsheet under the racing vehicles is mandatory. 1pc at least 4kg validated manual fire extinguisher is mandatory. Each service team has to ensure that after carrying out their activities on the site, they do not leave any pollutants. They will be checked by the scrutineers, and not complying will entail a 50.000HUF fine.

The Organizer calls the attention of the participants, that the Service Park is not guarded at night!

Art. 11.10.1 Service Areas / Bivouacs

Senior's Club, 9515 Pápoc, Vásár str.37

Entry will be permitted to the Servicepark only showing the Service Plates. Accompanying team cars can enter only by purchasing a 10.000HUF sticker at the Administrative Checks.

Art. 11.10.2 Flexi Service

Not applicable

Art. 11.10.3 Service allowed in Selective Section, Tyre fitting zone

According to FIA CCR 49.

Art. 11.11 Fuel and Refuelling Zone

There is no petrol station along the whole track of the Riverside Baja 2023., refuelling can be done in the servicepark area with the engine turned off. Having a min.4kg fire extinguisher and a protector canvas

underneath is mandatory!

Art. 11.12 Speed Control Zones

According to Roadbook

Art. 12. Identification of officials

Competitors Relation's Officer: pink tabard
Scrutineers: Blue shirt
Post Chiefs: Red tabard
Marshals: White or orange tabard

Art. 13. Prizes

LOCATION: Culture House, Rába str.8.,

TIME: 06.05.2023. 19:00

- Overall classification: 1-3 cup
- Group Classification: 1-3 cup
- Total Overall: 1-6 cup
- Vönöck offers a special award for the fastest competitor on SS4

Art. 14. Final checks / Protests / Appeals

Art. 14.1 Final Checks

LOCATION: Senior's Club, 9515. Pápoc, Vásár str.37.

TIME: 06.05.2023. Immediate after arrival in the finish.

Any teams required to undergo final checks must immediately follow the instruction of the marshals in charge, even if this prevents them from proceeding to one or more time controls (TC).

The complete original FIA homologation form, the FIA Passport and the vehicle's technical documentations must be available for final checks.

Art.14.2 Protest deposit

General: 350 €
Technical: 350 €

Art. 14.3 Appeal deposit

The appeal deposit for an international appeal is published on the FIA website:

<https://www.fia.com/international-court-appeal>

All protests and/or appeals must be lodged in accordance with Articles 13 and 15 of the FIA International Sporting Code and, where applicable, with the FIA Judicial and Disciplinary Rules.

Appendix 1 ITEMS AT THE ORGANISERS' DISCRETION

1. TIME CARD PROVIDING/EXCHANGES

Time cards will be issued before the Start of each Leg, which must be submitted to the marshalls at the Finish of each Leg. The time card must be filled up by the competitor as instructed by the judges.
Time card exchanging: at regrouping.

2. LIMITED TIME DELAY

Maximum delay between two TC is 30 minutes per Leg. Delay exceeding this limit will result in disqualification.

3. FIXED PENALTY

Competitors who got fixed penalties on a race day can revert to the race at regrouping areas up to the first vehicle's – (same group T, M, CH) - starting time according to the Itinerary (must be agreed with the CRO), or to the Parc-Fermé at the end of the day, until the first vehicle's planned time (same group T, M, CH). The CRO must be informed whether the vehicle can be put in the Parc-Fermé in the evening up to the opening hours, or only the next morning, after prior consultation with the technical committee, 60 minutes before the starting time of the first vehicle. The maximal times of the selective sections are stated in the Itinerary and Time Card.

The fixed penalty can only be used once on a race day.

Competitors who have completed at least one selective stage on Friday 05/05/2023, may enter the Parc Fermé and continue the race on Saturday, 06/05/2023. On Saturday, 06.05.2023 at least one selective stage must be completed by the competitor in order to be evaluated in the competition

4. PARC-FERMÉ RULES

Protecting canvas under the racing vehicle is mandatory!

According to CCRSR 58.1, the regrouping area qualifies as Parc Fermé, therefore the Parc Fermé rules apply in the Regrouping.

5. MAXIMUM SPEED

The FIA maximum speed (T4, T4nat:125 km/h, T3:135 km/h, T1, T2:170 km/h) are monitored by the GPS system, exceeding them will be and punished by the Stewards..

6. ELECTRONIC STORAGE DEVICE

The organizer draws attention to Articles 9.1.1 - 9.1.3 of the CCRSR., that all electronic and data storage devices **NOT** authorized are prohibited on board vehicles. This will be checked by the Scrutineers, and not complying with will be punished by the Stewards.

7. CHALLENGE GROUP

Regulation: TROB Regulation and sporting rules 2023.

Evaluation: depending of the number of the entrants!

Challenge group is competing at a certain average speed, performing orientation tasks. The reduced average speed for a specific stage will be determined by consultation between the Organizer and the Clerk of the Course. The competitor closest to the specified average speed (+/-) will be the winner of that stage. With the GPS navigation and safety tracking system, the average speed can be measured on different speed control points. At the end of the event, the Challenge Group's evaluation will be determined by taking into consideration the speed on the designated selective stages as well as any delays or early arrivals on the routes connecting the selective stages (etap).

In case of non-compliance with the rules, the Clerk of the Course decides on the further participation of the disciplined competitor on the basis of the Marshall's report, primarily based on the TROB Regulation and sporting rules 2023, but may also decide on immediate exclusion and initiate the revocation of the licence.

For CH category SS5 and SS6 will be performed in shortened distance- but with the same points, they won't perform SS4.

8. RECONNAISSANCE: Reconnaissance of the entire Riverside Baja route is forbidden!

Matricák felhelyezése / Positioning of the stickers:

1. Rajtszám / Competition nr.: 67x17cm
2. Reklámtábla / Advertizing decal : 30x30cm
3. Szélvédő matrica / Windshield advertising sticker: 25x10 cm
4. +3 perc / +3 minute
5. Szélvédő Rajtszám / Windshield start number: 20x10 cm
6. Tetőrajtszám / Roof start number: 50x50cm
7. Rallytábla / Rallyplate: 21x10cm

Appendix 4 – Extracts from FIA ISC Appendix L relating to overalls, helmets and any other safety requirements

All competitors are reminded of Appendix L of the FIA International Sporting Code, in particular its Chapter III - Drivers' Equipment.

Helmets (Appendix L, Chapter III, Art. 1)

All crews must wear crash helmets homologated to one of the following FIA standards:

- 8858-2002 or 8858-2010 (Technical List N°41),
- 8859-2015 (Technical List N°49),
- 8860-2004 or 8860-2010 (Technical List N°33), or
- 8860-2018 or 8860-2018-ABP (Technical List N°69)

Frontal Head Restraint (FHR, Appendix L, Chapter III, Art. 3)

All crews must use FIA approved FHR systems homologated to FIA standard 8858.

Approved FHRs, anchorages and tethers are listed in Technical List N° 29.

See also helmet compatibility chart in Appendix L, Chapter III, Art. 3.3.

Flame-resistant clothing (Appendix L, Chapter III, Art. 2)

All drivers and co-drivers must wear overalls as well as gloves (optional for co-drivers), long underwear, a balaclava, socks and shoes homologated to the FIA 8856-2000 standard (Technical List N°27) or 8856-2018 (Technical List N° 74). Please pay special attention to the prescriptions of Art. 2 concerning embroidery and printing on flame-resistant clothing (manufacturer certificates etc.) **as well as concerning the correct wearing of the clothing elements! See also FIA Cross-Country Rally Sporting Regulations Article 48.1.**

Biometric Devices (Appendix L, Chapter III, Art. 2.1)

Drivers may wear a device to collect biometric data during racing.

- If the biometric device is integrated into a protective garment homologated to FIA Standard 8856, the garment shall be homologated to FIA Standards 8856 and 8868-2018.
- If the biometric device is a stand-alone device, then the device must be homologated to FIA Standard 8868-2018 only. This device must be worn in addition to the garment homologated to FIA Standard 8856.

Wearing of jewellery (Appendix L, Chapter III, Art. 5)

The wearing of jewellery in the form of body piercing or metal neck chains is prohibited during the competition and may therefore be checked before the start.

MEDICAL AND SURVIVAL KIT (Appendix III of the Cross-County Rally Sporting Regulations)

A sealed and valid Medical kit in accordance with the Specification for Cross Country Rallies and Bajas (Technical List n°83) must be placed inside the cockpit. The minimum weight must comply with Technical List n°83.

Rallyinfo.hu - Technical description of the operation of the GPS system V1

Pic. No. 1.: **GPS box**

Sizes: 115x90x55mm

Weight: 340g + pipe clamps 110g

General operating principle of GPS measurements:

The GPS is an advanced positioning system for three-dimensional position determination, timing and velocity measurements can be carried out by land, sea or air. Accuracy is typically of the order of meters, but the environmental conditions can affect significantly. In the sky from the flat ground there are 7-25 satellites visible at the same time, of which for positioning at least three, for the height above sea level one additional satellite is necessary for determination. The GPS satellites are broadcasting at six frequencies. Each satellite broadcasts spread spectrum signal which may be "pseudo-random noise" called for.

The positioning is based on the theory of analytic geometric methods. The satellite positioning system is based on timing recycle distance measurement. Since we know the velocity of radio waves, and we know the date of issue and receipt of radio waves, can be determined based on the distance of the source of these. In the three-dimensional space knowing the exact measured distance from three known positions we are able to determine the position. Measuring the distance with other satellites we are able to improve this value.

Cause A significant distortion in the system can be caused by the effect of atmospheric to the radio waves. At the description of the calculations we assumed that to simply calculate with the distance = rate x time formula. This is true, but that the speed of radio waves are only constant in the vacuum pressure.

Evaluation of data

The evaluation of uploaded data can be determined inf two different ways.

Initial assessment of the competition supervision interface, real time data available online. This means the data that the device has been uploaded to the central database and downloaded online, analyzed by the supervisory program. The yet uploaded, or not yet analyzed data will be carried over in the subsequent analysis. Not uploaded data case occurs when the device is in the absence of strenght of GSM signal, and can not upload data to the central database. In the case where the data is available online in the database, but local network is busy or the

downloads has interrupted due to bad network relationship, then the analysis of loss data only partially can take place online.

Alternate method is retrospective data analysis. In this case, the data collected what has been received by a specified time interval sets the database to a file, and the data can be evaluated from point to point.

Vehicle to Vehicle Alarm (VTVA) function

The device has a frequency of 433 MHz using radio module, which is broadcasting the data of an encoded in advance "bagpipe" and SOS functions corresponding sets of data, for the tools staying in range. The range distance can be greatly affected by ambient atmospheric conditions and terrain. The device has adjustable transmission power. This value is not possible adjustable during the race. Currently, the vehicle to vehicle alarm system has two functions:

- "Toot" function, which indicates the overtaking intent of a VTVA equipped car up to 100m distance. Pressing the SOS button, placed in the box, a red LED indicates the start, which lasts for 5 seconds. In the event that the other device receives the sent signal, then this confirms to the sending device and the server uploads the signal, and at the same time, in the overtaken vehicle's SOS panel's LED will lit blue with a beep sound (continuous), and in the overtaker's vehicle the LED color changes from red to blue light, no beep sound here. The indicator remains on the overtaken's vehicle for 10 seconds. Then, each signal is switched off until a next signal.

- Send SOS signal devices within range. This feature will be active if on the SOS panel, the SOS switch is turned on. Send the device continues the signal, until the SOS switch is turned on. In the case where a device receives the SOS signal, on the SOS panel the red and blue LED will blink, with a pulse (0.5 s) alarm signal, as long as is still within range. This feature requires a power supply operation.

Pic.No. 2.: **SOS Panel** Sizes: 95x48x67mm

Weight: 120 g

Tool installation

- SOS panel, vehicle to vehicle alarm system antenna placement: Previously purchased SOS panel's red and black wires with the 2poled TMWS2T connector must be connected to the 5A fuse mating port (horizontal shoe positive, vertical shoe negative polarity), 15 poled connector's end has to be wired with the right B column. SOS panel should be placed on the dashbord in such a way that both the driver and the navigator can reach. The adhesive antenna supplied shall be affixed to the top right corner of the windshield horizontally, the end of the cable wired to the right-hand column B.

- Installing the device: The device received at the Administrative check must be connected to

the previously purchased and installed SOS panel and vehicle to vehicle alarm system antenna. The device must be fixed in the right column B with 2 clamps so that the device does not move and the visibility ensured.

Pic.No. 3.: How to install 1.4

Pic. No. 4.: How to install 2.4

Pic. No. 5.: How to install 3.4

Pic. No. 6.:
How to install 4.4

- To verify the functionality of the device will take place at the Technical Scrutineering.
- At the end of the race the device should be returned to the colleagues, where the deposit will be repayed. In case if the device has any problem, until identifying the problem, the competitor is entitled to the deposit only after a corresponding deduction.
